EXECUTIVE SUMMARY

Annual Revenue (TZS '000) — 2019 to 2024

~50% Gross Margin Held
Every year 2019–2024. The unit economics never broke.

91% Volume Lost
109K packets → 10K. Distribution collapsed, not the product.

0.3% Tanzania Market Share
1\$13.16M import market. Massive room to grow.

THE STRATEGY: A SELF-FUNDING GROWTH FLYWHEEL

Consultancy and materials generate stable cash → Reinvest in Glory Pads → Education drives demand → Sales scale the mission.

PROOF IT WORKS

500 cartons

sold in just 10 days during the 2018 WARIDI education pilot
= 3 months of normal sales

3× sales lift

proven correlation between Hedhi Salama education programs and immediate product demand

\$13M addressable

Tanzania alone imports \$13.16M of menstrual products yearly — Kasole holds only 0.3%

Build Internal Capacity

THE DISTRIBUTION PROBLEM — AND THE FIX

OLD MODEL (caused the collapse)

NEW MODEL (M-Pesa COD + Ambassador network)

THE AMBASSADOR MODEL (CEO's own recommendation for rural distribution)

DIGITAL CHANNEL INVESTMENT

Social Media & TikTok

Ambassadors + sponsored ads. CEO already uses this — needs investment to scale.

Bulk SMS Campaigns

CEO already texts her entire customer list 2× a month. Formalize with CRM.

E-Commerce Storefront

Shopify/WooCommerce for urban diaspora and institutional buyers.

CRM System

Track all institutional and B2B leads. Convert consultancy contacts into sales pipeline.

Financing & Working Capital

Use the stable B2B engine to fund Glory Pads recovery. Then layer in impact capital to scale.

TODAY

■ B2B + Consultancy ■ Glory Pads

3-YEAR TARGET

■ B2B + Consultancy ■ Glory Pads

THE CAPITAL STACK

GRANTS · Year 1

\$150–300K

USADF · Mastercard Foundation
Global Affairs Canada
The Case for Her

IMPACT EQUITY · Year 2

\$300–500K

Acumen · Alitheia IDF
AlphaMundi · MEDA

TRADE FINANCE · Year 3

\$100–200K

CRDB Bank SME · AfDB AFAWA

WORKING CAPITAL REFORM — THE THREE NON-NEGOTIABLES

1

No distributor credit.

M-Pesa COD replaces credit. Credit defaults killed cash in 2022.

2

3-month buffer.

Non-negotiable minimum. COVID proved the danger without one.

3

Invoice factoring.

Factor UNICEF/Ministry receivables to free working capital.

Manufacturing: Hybrid Approach

Keep China for quality. Add local assembly to cut cost and create resilience.

WHY THIS HYBRID WORKS

Quality Protection

Bamboo fiber from China keeps the core USP

Cost Reduction

Local assembly cuts shipping volume ~30–40%

Resilience

Partial local = less exposure to China supply shocks

AfCFTA Leverage

Local origin qualifies for reduced intra-African tariffs

Regional Expansion: South Africa First

"In South Africa, once you're in one supermarket, you're in different regions." — Hyasintha Ntuyeko, Founder

Phase 1 · 2026–27

South Africa — The Model Market

- Corporate retail = 1 conversation → nationwide distribution
- CEO already has product presence and relationships
- Strongest MHH social enterprise ecosystem in Africa

Phase 2 · 2027–28

Kenya + Malawi — Anchor the Region

- Kenya: diaspora anchor + existing MHH partner network
- Malawi: CEO's existing contacts, AfCFTA advantages
- Ambassador model proven from Tanzania → replicate

Phase 3 · 2029+

DRC + Zambia — Scale the Continent

- DRC: vast underserved market, early contacts established
- Social-franchise model: license the playbook + supply materials
- AfCFTA regional hub position secured

5) SUSTAINABLE ACCESS MODEL FOR LOW-INCOME & UNDERSERVED COMMUNITIES

TWO HIGH-IMPACT INNOVATIONS

THE AFFORDABILITY MATH

- Disposable pads: TZS 30,000/year per rural student (World Bank 2024)
- Reusable kit: TZS 11–13K up-front → ~TZS 500/mo amortized over 2 years
- Savings: up to 60% vs. disposables — affordable even at TZS 800/mo income

1. Revive the School Supply Program

- Schools receive subsidized pads
- Those who can afford pay; those who can't get free
- Schools = distribution + education hubs
- Impact: Reach 60–70% of unreached rural girls

2. Male Allyship as a Sales Driver

- Men often control household budgets in rural Tanzania
- Hedhi Salama already educates boys and men to break stigma
- When men understand menstrual health, they support spending on quality products instead of blocking it
- Result: Removes the "gatekeeper barrier" and turns men into active buyers and supporters

THE CASE FOR KASOLE SECRETS

Commercial viability meets an unshakeable mission.

COMMERCIAL IMPACT · 2028

7× revenue growth vs. 2024 (TZS 110M → 1.75B)
100K Glory Pads packets sold annually
+
6 countries active via regional expansion
≥50% gross margin preserved throughout

SOCIAL IMPACT · 2028

500K women and girls served (products + education)
+
100+ schools reached by Hedhi Salama
50+ jobs created (AFRIPads-validated curve)
10% of every sale reinvested in the social mission

Kasole Secrets doesn't need a new business model.

It needs to reclaim the one that worked — and build the infrastructure to never lose it again.
